Tip Type

Thread Shape

The thread shapes of the scaler tip differ between SC-3000, SC-7000, and SC-7000T2. Scaler tips for SC-3000 and SC-7000 have external threads, and scaler tips for SC-7000T2 have internal threads; these are not compatible with each other.

There is a laser-marked “Type T” on SC-7000T2 handpieces. Be sure to check the thread type and use the correct scaler tips for your handpiece.

Power Range

SC-3000 : 0 – 7
SC-7000 & SC-7000T2 : 0 – 25

Maximum Power Level

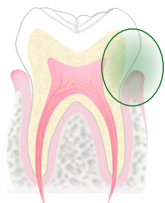

Do not use scaler tips in excess of their maximum (est.) power level. Using the scaler at powers higher than those recommended or applying the scaler tip with excessive force could result in overheating the treatment area or scaler tip, and damaging the scaler tip.

Scaling Tips

S1

Universal Tip S1

- Scaling, irrigation, and cleaning

Maximum Power (est.)

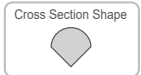

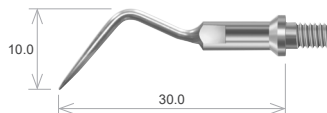

SC-3000	6
SC-7000	20

Code No.: 8710503

S2

Straight Tip S2

- Calculus removal (mainly inside periodontal pocket)
- Irrigation (cavities, root canals, blind pockets, periodontal pockets)
- Debris removal (cement, gutta-percha, sealer, fragments, etc.) from canals

Maximum Power (est.)

SC-3000	6
SC-7000	20

Code No.: 8713707

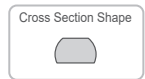

Dimensions (unit: mm) are standard ones; there may be some slight discrepancies for individual tips due to dimensional tolerances.

S3

Scaling Tip S3

- Scaling, irrigation, and cleaning (mainly fissures)

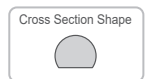

Maximum Power (est.)	
SC-3000	6
SC-7000	20

Tip Power Guide

Do not use scaler tips in excess of their maximum (est.) power level. Using the scaler at powers higher than those recommended or applying the scaler tip with excessive force could result in overheating the treatment area or scaler tip, and damaging the scaler tip.
